Errata

Summary of thesis:

Subjects and Methods, page 32, Figure 8: Now reads: ADOS Module 2, children without..
Should read: ADOS Module 2 and 3, children without..

Paper III:

Method, page 7: Now reads: .. three had mild and 14 had severe ID…
Should read: .. two had mild and 15 had severe ID..

Methods, page 8: Now reads: An intermediate score of “1” is taken to indicate the presence of autism, and is reclassified as “2” by the algorithm.
Should read: A score of “0” corresponds to absence of autistic behaviour, a score of “1” indicates a mildly abnormal or slightly unusual behaviour and a score of “2” a behaviour that is definitely abnormal.
