Errata

Landscape Dynamics – Spatial analyses of villages and farms on Gotland AD 200-1700
by Gustaf Svedjemo 2014

Page 13
The two sentences at the end of the first paragraph, should be one sentence connected with an even if, and be as follows:
“On the mainland, new research and excavations have revealed much greater variations in the population and number of farms than was previously estimated and there is no reason to believe that these trends are absent on Gotland, even if the society on Gotland has several unique features, which in some respects has led to a unique development.”

Page 33
First sentence should refer to the work of Nihlén, and read as follows:
“The view of Nihlén was challenged by Claes Claesson and Harry Thålin, who reject the idea of villages”

Page 93
The heading in table 3.1.14 is wrong. The correct table should look like this:

<table>
<thead>
<tr>
<th>Village size</th>
<th>2 farms</th>
<th>3 farms</th>
<th>4 farms</th>
<th>6-5 farms</th>
<th>8-7 farms</th>
<th>12-10 farms</th>
</tr>
</thead>
<tbody>
<tr>
<td>Mean index</td>
<td>1.6</td>
<td>1.6</td>
<td>1.3</td>
<td>1.5</td>
<td>1.3</td>
<td>1.2</td>
</tr>
</tbody>
</table>

Page 93
A vital “not” is missing in the first sentence in the second last paragraph, which should be.
“The 40 largest farms, over 70 metres are not overrepresented in villages.”
In the last paragraph, there is an erroneous reference to table 3.1.9. The correct reference is to table 3.1.11.

Page 103
Table 3.2.2, displaying descriptive statistics and the result of a T-test, should be omitted since it was included by mistake.

Page 197
The next to last paragraph on the page should be “There are around 200 known medieval stone houses, including vicarages, and probably some unknown; say that there have been somewhat more than 200 stone houses in the countryside, excluding vicarages.”
